

Ready, Set, Glow!

WHAT IS IT?

LiteZilla™ is a handcrafted, glowing, interactive canvas. LiteZilla™ features a customizable front grid, backlit with energy-saving LEDs. People of all ages can insert our enormous LitePins™ into the grid to create and illuminate any design, pattern, or message they wish.

IS IT SAFE?

Yes! Each LiteZilla™ mounts securely to the wall using metal Z-clips capable of holding more than 5x the weight of the LiteZilla™.

Our LitePins™ have been reviewed and cleared by a licensed pediatrician as non-choking hazards, and safe for children of all ages. The LitePins™ will not warp, shatter, or corrode. They are not affected by sunlight, aging, temperature, or moisture.

Both the LED lights and the power supplies are UL certified. The LEDs are redundant, so in the rare chance of one diode failing, the light output will be unaffected.

The front grid holes have no closing flaps and no sharp edges, keeping little fingers safe.

WILL IT WORK NEXT TO A WINDOW?

Absolutely! LiteZillas™ feature custom LED curtains. They have extra-large diodes with high-lumen output so colors look great in directly sunlight and at night.

HOW BIG ARE THEY?

LiteZillas™ are made to order and can be manufactured in any size or configuration that you need. Units start at 3 feet wide x 3.5 feet tall (good for 2 kids). Large-scale installations can be over 10 feet tall and 25 feet long.

WHAT COLOR LITEPINS DO I RECEIVE?

Our transparent LitePins™ are available in 15 colors including Red, Orange, Yellow, Green, Blue, Purple, Pink, White, and opaque Black.

All of our LitePins™ can be ordered with custom engravings on the ends. Options include company logos, alphabet letters, hashtags, numbers, and symbols.

IS THERE MORE THAN 1 MODEL OF LITEZILLA™?

Yes! We have several different models available. We offer wall-mounted, free-standing, mobile, and tabletop LiteZillas™. LiteZillas™ can have 1-6 usable sides. They can even be ordered weatherproof so they can be played with outdoors.

CAN IT MATCH MY INTERIOR DESIGN?

We make LiteZillas™ out of solid hardwoods as well as black HDPE. They can be painted to your specifications. Specialty LiteZillas™ can be made out of exotic woods and metal.

HOW DOES IT TURN ON?

Just plug it into the wall. LiteZillas™ come with a single plug that goes into a standard 110V American power outlet. They are powered on/off via a light switch built into the side of the frame. Select units can be ordered with battery packs.

WHAT IS YOUR WARRANTY?

More than just a contract, our warranty is our personal commitment that you'll be satisfied with your purchase now and in the future. The LiteZilla™ unit has a LIFETIME warranty on all material and/or workmanship defects. The lights and electrical components come with a 2-year warranty.

HOW DO I GET ONE?

Simply give us a call at 1-833-LITEZILLA™ or email us at info@LiteZilla.com and one of our Illumineers will be happy to assist you with your order.

There is a 8-12 week lead time depending on the orders in our queue.

LiteZillas™ can be crated shipped worldwide with all hardware required for installation.

They come fully assembled with step-by-step installation instructions. Most LiteZillas™ can be installed in less than 1 hour.
